

Pre macOS 10.10 Manual Installation Procedure

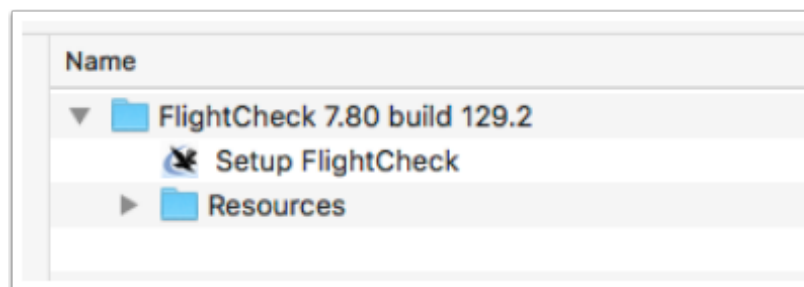

The new FlightCheck installer is designed to run ONLY under macOS 10.10 and higher. If run under macOS 10.6.8 thru 10.9.5 the installer will fail.

If you are running macOS 10.6.8 thru 10.9.5, PLEASE Manually Install FlightCheck using the drag and drop method described in this document.

Download and Decompress the FlightCheck Installer file

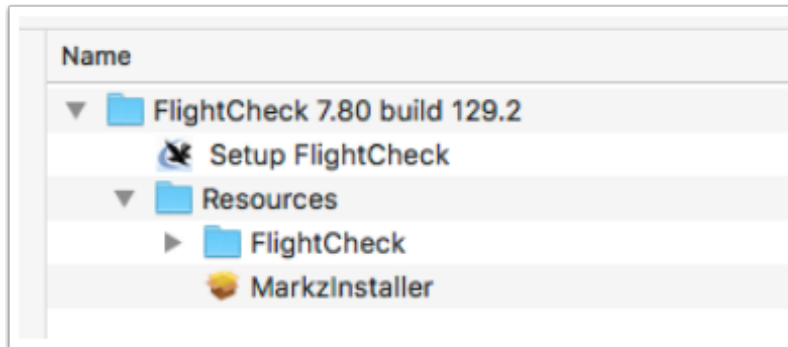

Double-Click the FlightCheck Installer folder to open it

Open the Resources Folder

Inside the Resources folder you will see two items

1. A folder name FlightCheck
2. The MarkzInstaller application

Drag the FlightCheck folder to your Applications folder

Make sure to move the entire FlightCheck folder and its contents to your Applications folder.

You are now ready to start up FlightCheck from your Applications folder.
